

Issued April 2002

TRANSIT HORDERN 6X2 SERVICE REQUIREMENTS

Every 15,000 kms

1. Check wheel bearings on lazy axle
2. Check centre pivot and record the amount of travel up slot
Lightly grease (not outside)
(Original Ford springs have sagged if bolt is at back of slot)
Do not overtighten bolt- bolt has a shoulder, bolt should still be free to rotate, if too much play – replace vesconite & sintered metal washers
3. Check drive axle – beam pivot bolt (top of drive axle)
Do not over tighten bolt – 30Nm torque
4. Check leaf spring eye bolt for tension (front hanger – original Ford)
5. Check brake pads for wear
6. Rotate rear 4 tyres
7. Check rear axle-beam attachment bolt

TIME ALLOWANCE: 0.5 hrs

Every 45,000 kms

1. As per 15,000 km service
2. Repack rear wheel bearings on lazy axle

TIME ALLOWANCE: 1.0 hrs
